Analyst – Data Quality & Governance | SQL · Python · Power BI

Dublin-based **analyst** with Masters in **Financial Data Science**, **focused on** governing prioritized data assets, profiling and monitoring quality, **and** closing the loop on remediation **with product and engineering**. **Comfortable with** user-submitted corrections, **lightweight** DQ rules in SQL/Python, **and** Power BI **dashboards with alerts**.

Education

M.Sc. Financial Data Science | University College Dublin, Dublin, Ireland | Sep 2024 – Aug 2025

- **Key Modules:** Machine Learning for Finance, Derivative Securities, Python for Financial Data Science, Portfolio & Risk Management

B.Sc. Information Technology | University of Mumbai, Mumbai, India | Jun 2020 – May 2023

- **Key Modules:** Numerical and Statistical Methods, Python Programming
- **GPA:** 3.4

Skills

- **Data Quality & Governance**
 - Data profiling (null, key, range, freshness checks)
 - Data integrity assurance, issue escalation & remediation
 - User-submitted data corrections, SOP/audit documentation
 - Reference/lookup tables, entity resolution, hierarchy mapping
- **Analytics & Technology**
 - SQL (joins, CTEs, window functions, validation queries)
 - Python (pandas, NumPy, automation scripts)
 - Power BI/Tableau (dashboards, KPIs, alerts)
- **Business & Communication**
 - Data storytelling & visualization for stakeholders
 - Cross-functional collaboration (Product, Finance Ops, Engineering)
 - Requirement gathering & documentation

Experience

Analyst, Regulation & Data Integrity | 06/2023 - 05/2024

Countrywide Chemlogistics - Mumbai, India

- Retrieved and analyzed operational data using **SQL and Excel**, performing trend analysis that **helped streamline a key reporting workflow**.

- Built and maintained **Power BI dashboards** that integrated multiple data sources, providing **senior stakeholders with timely visibility** into KPIs and data-quality exceptions.
- Mapped the processes behind **priority KPIs**, documented data definitions, and prepared **business-facing reports** that recommended solutions to address **emerging data-quality and performance trends**.
- **Owned day-to-day data integrity checks**; raised issues through ticketing, **escalated anomalies**, and partnered with engineering and product teams to ensure resolution and proper audit trail.
- Partnered with the **Commercial team** to evaluate campaign and sales performance, delivering **data-driven insights** that informed business decisions and reinforced cross-functional data governance.

Projects

Corporate Bankruptcy Data Asset – Quality Assessment & Insights: Profiled 80k+ firm-years; defined acceptance tests; built research-grade **reference tables**; produced BI views for modelers.

Di-VERIFY – Identity Data Stewardship Prototype: Designed flows for **data correction approvals**, audit trails, and a consumer identity "golden record" concept; articulated **governance** policies.
